DHMH Data Systems Directory

System Name

System Description

Adult Day Care	This system collects data for the Adult Day Care Program. It tracks surveys and fire inspection information.
Agency Help	This system contains data entered by the PSA Contracts Unit on 20 Agency Help vendors that supply temporary staffing assistance to Headquarters Units, DHMH Facilities / Health Departments in Baltimore City, Baltimore County, Anne Arundel County and Howard County.
Ambulatory Care	This system collects data for the Ambulatory Care Unit. In addition, the unit has responsibility to license ten (10) different programs.
Assisted Living	This system collects data for the Assisted Care Program. It tracks surveys, fire inspection information and the flow of documents through the unit.
Behavioral Risk Factor Surveillance System (BRFSS)	The data gathered in this survey is maintained on this system. It includes data on a variety of risk factors, chronic diseases, and preventative health services among the non-institutionalized, civilian population 18 years of age and younger. (NOTE: Similar surveys are conducted in all 50 states, the District of Columbia and 3 territories.
Birth Defects Reporting & Information System	This system maintains data on birth defects in Maryland. The data is analyzed in order to establish the incidence of birth defects, monitor trends and to provide both information about birth defects and resources to parents of affected children.
Births	This Vital Statistics Administration System contains one record for each birth occurring in Maryland.
Breast & Cervical Cancer Billing System	This system operates the Reimbursement for Diagnosis and Treatment of Breast and Cervical Program. The program pays claims to providers for diagnostic testing, and treatment to detect / treat breast and cervical cancer in eligible women. The system also collects data on women needing diagnosis / treatment, providers performing services and claims for services rendered.
Breast & Cervical Cancer Screening	This system maintains data collected by the 24 Local Health Departments on women receiving breast and/or cervical cancer screenings (mammograms, clinical breast exams and pap test.
Budget Tracking	This system maintains the Budget Management Office Tracking Log.
Cardiovascular Disease – Grant Reporting System	This system is maintained to summarize quantitative program data for local, state and federal reporting requirements in the areas of public information, personal health services, consumer education / skills training, health provider / educator education & training, community organization & environmental support as well as program development & evaluation activities that are related to cardiovascular health and nutrition initiatives.
Cash Receipts	This system is used to print receipts for funds received by DHMH. In addition, the record information that is contained on the system interfaces with FMIS on a daily basis.
Children's Medical Services Program	This system maintains a file of the Children's Medical Services (CMS). It is also used to pre-authorize services and generate payment vouchers for the providers of health services or supplies to the CMS patients. The CMS system also permits staff to add, inquire and/or modify records on patient Personal Details, Eligibility, Authorization and Bill Review.
Claims Procsg Subsys	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Deaths	This Vital Statistics Administration System contains one record for each death occurring in Maryland.
Developmental Disabled Reporting System	This system collects consumer complaint data for the Developmentally Disabled Unit.
Developmental Disabled Licensing System	This system tracks licensing for the Developmentally Disabled Unit

Licensia System Developmental Disabilities Administration – Electronic Billing System Divorces Divorces This system permits DDA providers to maintain client attendance at residential and day sire facilities on a monthly basis. The client database also contains client demographics, caregiver and guardian demographics of daily living, financial assistance and service provider information. Divorces This Vital Statistics Administration System contains one record for each divorce occurring in Maryland. EPSDT Subsystem NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file. Expedited Payment Process Contract Activities Database Freestanding Ambulatory Surgical Facilities Survey. Geographical Codes Survey. Geographical Codes Survey. NOTE: This information is comprised of codes used by Vital Statistics to denote specific regions in the State of Maryland. This system contains demographic data, risk factors for increased potential for hearing loss, hearing screening results, and follow-up dato and all babies born in a Maryland hospital who are screened for potential hearing loss. HMO Database Home Health Agency Annual Survey This system contains data that is supplied by Medicare Certified / Licensed Home Health Agency steryes, by jurisdiction. License Renewals	This system is operated on behalf of the Board of Occupational Therapy Practice. It provides up-to-date information on the health professional's license including the license number, licensee's address, status, expiration dateetc. The database als o offers the Board the to verify licensure status for consumers, employers, hospitals and other interested parties.
License Renewals	This system is operated on behalf of the Board of Optometry. It allows staff the ability to update address information, names, expiration dates, reinstatement date, education and school attended as well as other important data pertaining to license.
License Renewals	This system is operated on behalf of the Board of Pharmacy. It permits the Board the opportunity to efficiently verify mandated statute and regulation data as will as the capability to aide in consumer protection, licensure, disciplinary compliance and public education.
License Renewals	This system is operated on behalf of the Board of Physical Therapy. It enables the Board the opportunity to add, inquire and modify records. The system generates licenses, renewals, labels and rosters.
License Renewals	This system is operated on behalf of the Board of Professional Counselors (including drug and alcohol counselors, marriage counselors and family counselors). It enables the Board the ability to add, inquire and to change records.
License Renewals	This system is operated on behalf of the Board of Social Work Examiners to maintain a file on licensed social workers. It permits the Board to add, inquire, change or delete records.
Long Term Care	This system maintains data for the Long Term Care Program. It tracks fire inspection and survey information.
MAR Subsystem	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Marriages	This Vital Statistics Administration System contains one record for each marriage that occurs in Maryland.
Maryland Electronic & Surveillance Reporting System	This system has been designed for reporting, editing, and analyzing case reports of communicable diseases reported in Maryland's 24 jurisdictions. It is Maryland's adaptation to the CDC's National Electronic Telecommunications System for Surveillance (NETSS) Database.
Maryland Hospital Ambulatory Care	This system is operated on behalf of the Health Services Cost Review Commission (HSCRC). It contains a record for each outpatient hospital encounter in Maryland.
Maryland Inpatient Casemix	This system contains a record of each discharge from an acute care hospital in Maryland.
Maryland Long Term Care Survey	This system is operated on behalf of the Maryland Health Care Commission. The system maintains data, data entry, and edits for the nursing homes, adult day care centers and assisted living facilities in Maryland.
Maryland Reproductive & Perinatal Information Data System (RAPID)	The 24 local health departments use this system (and the associated RAPID software) to collect data from clients receiving Family Planning or Colposcopy Services.
Newborn Screening & Infant Hearing (NEST)	This system contains a converted Newborn Screening Laboratory System file that provides demographic data collected on the Newborn Screening Laboratory Slip and the Newborn Screening Results. It has been established to track babies with abnormal screening results and that were reported to OGCSHCN.
Newborn Screening System	This is a contractually developed Laboratory Information Management System (LIMS). The system consist of a Specimen / Patient File containing initial and follow-up records for each baby screened a Hospital File, a Physician File, a Test Name File, a County FIPS File and a Footnote File.
Payroll	This system gathers information from the CPB cost tape and prints Bi-Weekly Payroll (310 and 311 reports) in FMIS PCA numbers. After being queried against the FMIS history file to ensure accuracy the information is printed out for General Accounting.
Provider Consumer Information System version 2 (PCIS II)	The Developmental Disabilities Administration (DDA) operates this system. It is an Internet-based client server application that is designed to facilitate DDA's purpose of providing services to the developmentally disabled.
Personnel Position Status	This system is maintained by DBM's Office of Personnel Services & Benefits for Position File Status on approximately 11,000 DHMH employees. PSA staff view / query via ADC applications for report purposes.

Physicians and Allied Health Licensure/Certification System	This system is comprised of programs & relational tables that track Physician Medical Licenses, Osteopaths Licenses, Physician's Assistants, Radiographers Initial Certification Radiographer Intern Registration, Radiographer Reinstatement, Radiographer Therapist Certification, Nuclear Medical Therapist Initial Certification, Nuclear Medical Therapist Intern Registration / Reinstatement, Physician Assistant Initial Certification, Physician Assistant Reinstatement, Respiratory Care Practitioner Initial License/ Reinstatement.
Physicians Assistant Delegation Agreement System	This system tracks and maintains mandated contractual agreements between a physician and their subordinate physician assistant(s). The system allows a staff member to maintain an accurate picture of each current application request that is traveling through the process.
Physicians Facility Privilege System	This system tracks current facility privilege information on physicians. The data is used internally for gathering investigative details and to aid the Board in disseminating disciplinary information to facilities about doctors that are practicing within their facilities.
Physicians Practice Information System	This system contains data on Physicians Licensed in Maryland.
Physicians Profile System	This system has been built to track and ultimately display physician profile information on BPQA's profile web site.
Pre-authorization Sub-system	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Private Vehicles / Journal Entry Invoices	This system is used by General Accounting to retain information on reimbursements to individuals for work related total vehicle mileage on private cars. The system is also used to capture DHMH Journal Entries that interface with FMIS and Local Health invoice and expense account information that will interface with FMIS.
Provider Subsystem	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Recipient Subsystem	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Reference Subsystem	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Sexually Transmitted Diseases Management System	This system has been designed to store, retrieve, manage and report on various types of sexually transmitted disease data. The information is being captured for the Division of STD Prevention.
Sickle Cell	This system contains follow-up data on children, 0-5 years of age that have been identified with hemoglobinopathy through Newborn Screening. It is linked to the NEST (thNewBorns) for the Newborn Hemoglobin Results. Data is used to track children with Sickle Cell disorders and to document long-term care outcomes.
Somerset County Accounts Receivable Database	This system has been established to capture financial, billing and insurance information regarding client visits and service that is provided during those visits. The data is used to produce electronic and paper claims and statements
Special Payments Payroll	This system contains data entered by the PSA Contracts Unit on 1500 Special Payments Contracts initiated annually for headquarters and certain health departments. The file is also used by the PSA Payroll Unit to confirm authorization to pay contractual employees.
Substance Abuse (SAMIS)	This system contains client-level data on alcohol and drug abuse treatment admissions and discharges.
SUR Subsystems	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
System Overview (MMIS)	This is the Medical Management Information System. It is used for processing all Medicaid program data.
Testing Services – Application Management	This system is used to track applications (MS-100) from those seeking employment at DHMH.
Timekeeping	This system contains current & historical data (past five years) records on employee time and leave for headquarters, various facilities and one health department. The system is also used to extract information from the DBM Position Status File.
TPL Subsystem	NOTE: Although this component has been listed, as of this date we have yet to receive any information to populate the file.
Training Services Events	This system contains all training for programs/classes provided by the Services Div.

Training Services Registration	This system contains all employee registration for programs provided by the Training Services Division.
Tuberculosis Information	The TIMS system provides the tools those aide health care facilities to treat, control,
Management System (TIMS)	and eliminate tuberculosis in the United States. Information collected is transmitted
	to the Center for Disease Control Prevention for statistical and research purposes.
Volunteer Services – Managing	This system is maintained and updated by Volunteer Services. It has been
for Results	established to compile statistics on the number of volunteers, total hours, cash and
	material donations for seventeen (17) facilities and several Local Health
	Departments.
Women, Infants and Children's	This WIC Information Management System contains data supplied by WIC clinic
Program	staff throughout Maryland on enrollment information and food issue instruments in
	the form of checks.
